

# GODA CIVIL PROJECT

(Smart City Funded INR 15.4 Cr)

## PROJECT SUMMARY

This project was mainly focused on segregation of storm water drain and sewerage line by redirection of nalas into the sewerage system ensuring that it does not get mixed/immersed with the Godavari river.

The project involved the construction of the RCC box drain/ RCC pipe line.

- ▶ Reinforced concrete pipeline.
- ▶ Efficient stormwater drain system of 1.80 km.
- ▶ Efficient sewerage drain system of 1.88 km.
- ▶ Redirection of sewage through successful diversion from the Lendi Nala into the sewerage system, ensuring it no longer contaminates the Godavari river.
- ▶ This project played a pivotal role in reducing pollution and rejuvenating the Godavari river.
- ▶ It helped in supporting a healthier environment and improved water quality for the community.

## IMPACT
